

Uplifting, Eco-Conscious Gifts

Learn about Compendium's Sustainable Practices

We believe that choices matter. Each one is an opportunity to make the world a brighter place. That's why we're committed to creating gifts that are consciously crafted, with both people and planet in mind.

Responsible Packaging

We strive for minimal waste. We choose paper over plastic whenever possible, and you won't find bubble wrap in your box when you open your order.

Plants, Not Petroleum

Our books, journals, pop-open cards, and desk inspiration sets are all printed with soy-based inks made from renewable resources, which degrade more quickly and completely than petroleum-based inks.

Recyclable

Our Positively Green, Love Muchly, and forthcoming Make Someone's Day cards don't use mixed embellishments, so they are all 100% recyclable!

Chlorine-Free Processing

By using chlorine-free processing to whiten paper pulp, substantially fewer harmful components are released into the environment.

Powder-Coated Displays

Powder coating does not release the toxic fumes that liquid paints do. That means it's safer for the environment and for workers too.

Ethically Sourced Paper

We utilize paper from sustainably managed forests, certified by the Forest Stewardship Council.

We know there's always more we can do, so we'll keep looking for ways to improve our practices. Because it will take each of us to make a difference for all of us.
